Project:

Name	Content
❖ Job Ease	A sophisticated web development project that serves as a comprehensive platform for job seekers in the field. This innovative solution empowers users to effortlessly discover and apply for diverse job openings while also providing the capability to post new job listings. Job Ease bridges the gap between talent and employers, redefining the job search experience. link:- https://github.com/vedangj72/JobEase.git
❖ Gym Buddy	A web app that tracks and stores users' workout records using the MERN stack (MongoDB, Express.js, React. Node.js) and React Router for seamless navigation. React is employed for the dynamic user interface, while the MERN stack handles data storage and server-side logic. link:- https://github.com/vedangj72/Gym-Buddy.git
❖ Bookshelf	The MERN stack Bookshelf app uses Node.js/Express.js for the backend, MongoDB for storage, and React.js for the frontend. Users manage books with basic CRUD operations, supported by simple error handling .This project offers a concise introduction to full-stack web development. Link :- https://github.com/vedangj72/Bookshelf.git
